

FEC XPOS

An Expandable connectivity to all trades

With the diversity of the XPOS you can make use of XT-100 and have the flexibility of mounting the screen separately from the base giving quick and simple connection to a variety of peripherals. The XPOS gives you the ultimate experience and flexibility needed in the next generation of POS.

XP-3685W

*XT-100 with basic I/O also provides USB DP wired connection

TP-100 XP-3685 with wallmount

Make the most of your experience.

XT-200 offers further flexibility with two layers of I/O providing the capability of using a wider range of peripherals such as barcode scanner, card readers, electronic payment devices, weigh scales improving checkout efficiency whether through wireless or wired transmission.

* XT-200 with advanced I/O also provides USB DP wired connection

Change your checkout experience for the better

The XP4685 /w offers even greater flexibility. By rotating 180 degrees it can be customer facing allowing it to be used as a self-checkout solution greatly reducing manpower and costs.

The brand-new XPOS has streamlined shape combined with exquisite craftwork. The flexible base can be adjusted from 65 degree down to 15 degree and the display monitor can be tilted 180 degree angle to fit inside of a compact packaging. No matter how you adjust your desire angle , you can enjoy its exquisite and flexible design and enhance your customer experience.
